Allowable Subject Matter

1. The following is an examiner's statement of reasons for allowance: The present invention is directed to a computer system having an integrated core and graphics controller device capable of accessing system memory and a separate frame buffer memory simultaneously. The independent claim identifies the uniquely distinct features "a first and a second memory data buses interconnecting the system memory and frame buffer separately from the integrated core and graphics controller" and a memory address and control signal bus interconnecting the integrated core and the system memory and frame buffer. The prior art to Poirion (6,232,990) suggests two separate data, address and control signals buses interconnected to both system memory and frame buffer, respectively. The prior art to Katayama et al (5,867,180) (see Fig. 7) and Chen et al (6,292,201) (see Fig. 3) show a single data, address and control signal bus interconnected to both system memory and frame buffer. Therefore, the prior art either singularly or in combination, fails to anticipate or render the present claimed invention.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

2. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Kee M Tung whose telephone number is 703-305-9660. The examiner can normally be reached on Tuesday - Friday from 6:30 am - 5:00 pm.
